

DROP

Leak Detector

Protecting Your Home From Water Damage

Never worry about coming home to frozen pipes, absurdly high water bills or a soaked kitchen. These inconspicuous water-saving devices integrate with our smart water monitoring system to safeguard your home – and your wallet – from the hazards of water leaks and bursts in the home.

Features

- Senses leaks and monitors temperature
- Home internet connection allows homeowners to receive alerts anytime and anywhere
- Automatic updates and warning signals whether you are home, work or away on vacation
- Real-time alerts assure homeowners that their property is protected from extensive water damage and expensive insurance claims
- 2 (AA) Batteries with 5 year life
- DROP App to Control System from Anywhere
- 1 Year Warranty

Benefits

The DROP Leak Detectors are sophisticated wireless water sensors designed to integrate seamlessly with all other elements of the DROP Smart Water Management System. This wireless capability makes it easy to monitor and control it all right at your fingertips from any smartphone or other mobile device, whether you are at home or away.

DROP Leak Detectors provide critical data to the DROP water management system to help protect your home from water damage. DROP Leak Detectors sense water in the area and continuously monitor the temperature. This is especially useful in climates where freezing can occur. The leak detectors can be independently configured to automatically shut off the home water supply when the temperature falls below a user designated level or just provide notification of the condition.

Optional 6' Leak Detector Cables extend the range of the DROP Leak Detector. This cable connects to a leak detector and can be placed in areas that are harder to reach like behind toilets and washing machines, under sinks and dishwashers, and around water heaters.

The DROP Hub

The Leak Detector requires the function of the DROP Hub. The Hub is the connection to everything on the DROP Smart Water Management System. It integrates all of your DROP residential water devices together.
